INSTEAD OF  
BUILDING YOUR  
OWN APP  
**JOIN THE**  
**NETWORK**  
OF EMERGENCY  
SERVICES  
PROVIDERS

## ONE APP

For All Your Emergency NEEDS!

# INTRODUCTION

Respo is determined to build a platform where emergency services can be dispatched efficiently in a timely manner in order to save lives. Being a technology company we understand the importance of innovation and that is why we have dedicated our resources to developing a solution which helps emergency responders leverage technology in order to save lives.

## OBJECTIVE

To create ONE Emergency Response Application where clients can find and link to their preferred emergency services provides in the security, ambulance and roadside assistance fields.

# THE PRODUCT

The Respo is a multi-tenant platform for Emergency Services Providers who wish to take advantage of our communication software in order to better service their clients in times of emergencies. We make it simpler for service providers to respond faster to emergencies, keep a database of their customers and consistently communicate with their customers on a monthly bases.

## FEATURES

**FASTER & SIMPLER Emergency Request Process**

**Monthly Broadcast via SMS or Push-Notification**

**Client Database**

Client Emergency Profile includes Medical details

Next of kin contacts

GPS enabled

Saved locations

Support/ Management Dashboard

**"We provide easy access to Emergency Response Technology at a fraction of the cost!"**

**"We help you create new revenue opportunities through our technology"**

**"We help you retain your existing customer base while we expose you to new customers."**

# HOW IT WORKS

First; we help you create a **Company Profile** with the specific service(s) you offer.

Once, the profile is created your company will be allocated a **Service Provider Code** e.g. “32456”

Your client will download the Respo app and **Add your Code** as their preferred Service Provider.

When the client is in need of your service they will just simply open the app and select the type of service they need.

After the client sends a request a notification will be sent to the Support Center **Respo Dashboard** and both the Manager and Supervisor will receive an **SMS** to ensure that multiple people are made aware of the request.

The request will have the following client's information: **Name, Phone Number, Next of Kin contacts, GPS location, policy, client code or medical aid details and a health profile consisting of allergies, chronic disease and disabilities.**

**RETAIN AND SECURE  
YOUR CLIENT  
DATABASE**

## **MISSION**

**"To BECOME the Biggest  
and most Reliable  
platform in Africa to  
access emergency  
services "**
